Major Primary Timber Processing Facilities in British Columbia

2001

Economics and Trade Branch
Ministry of Forests
Victoria, B.C.

May 2002

Foreword

This is the 2001 edition of the Ministry of Forests' *Major Primary Timber Processing Facilities in British Columbia* and refers to timber processing mills that have primary log processing capability and which operated during 2001. Coverage does not include re-manufacturing plants. Pulp and paper mills and panel plants are included in this report even though some do not have primary log processing capabilities.

Reported information was gathered by surveying the individual processing mills. If a response was not submitted by a mill, mill specific information reported in trade publications, directories and corporate annual reports may have been used. In some cases Ministry of Forests staff provided estimates based on their knowledge of the operation and information reported in previous years.

Where a mill produces more than one product (e.g. lumber and plywood; lumber and paper), it will be listed in the respective sections of the report. Mills that ceased operating part way through 2001 have been identified with an asterisk (*).

This report is available free of charge on the Ministry of Forests' Internet site at:

http://www.for.gov.bc.ca/het/

Requests for copies of this report can be made to:

The report is updated annually. Any errors or omissions in this report should be communicated to one of the above locations.

Acknowledgements

The cooperation of mill personnel who responded directly to the Ministry of Forests' survey is gratefully acknowledged.

The important role played by Ministry of Forest regional and district staff in securing mill responses is also gratefully acknowledged.

CHIP MILLS

(Listed Alphabetically)

Only mills that produce wood chips as a primary product are listed in this section.

Notes:

1. Measurement units are in thousands of bone dry units (000 BDUs).
2. Estimated annual capacity is based on a standardized operation of 240 days per year, two 8 hour shifts per day, although actual mill operations may vary from this schedule.

CHIP MILLS - 2001

Mill Number	Company	Location of Mill	Forest Region	Forest District	Estimated Annual Capacity (000s of BDUs)

LOG HOME MILLS

(Listed Alphabetically)

Mills that process logs to manufacture log homes are listed in this section.

A throughput capacity measurement is not as meaningful for log home mills as it is for other types of primary timber processing mills. Therefore this section does not include information pertaining to estimated annual capacity.

LOG HOME MILLS - 2001

Mill Number	Company	Location of Mill	Forest Region	Forest District

LUMBER MILLS

(Listed Alphabetically)

Mills producing lumber are reported in the following 2 sections:

a) Mills that produced more than 3 million board feet (million bf) of lumber during the year.

b) Mills that produced less than 3 million board feet (million bf) of lumber during the year.

Notes:

1. Measurement units are in millions of board feet (million bf).

2. Estimated annual capacity is based on a standardized operation of 240 days per year, two 8 hour shifts per day, although actual mill operations may vary from this schedule.

THE FOLLOWING MILLS PRODUCED MORE THAN 3 MILLION BOARD FEET OF LUMBER IN 2001

Mill Number	Company	Location of Mill	Forest Region	Forest District	Estimated Annual Capacity (Millions of Board Feet)

POLE AND POST MILLS

(Listed Alphabetically)

Mills producing poles and posts are listed in this section.

Notes:

1. Measurement units are in thousands of pieces (000 pcs).

2. Estimated annual capacity is based on a standardized operation of 240 days per year, two 8 hour shifts per day, although actual mill operations may vary from this schedule.

POLE MILLS - 2001

Mill Number	Company	Location of Mill	Forest Region	Forest District	Estimated Annual Capacity (000s of Pieces)

PULP AND PAPER MILLS

(Listed Alphabetically)

Mills producing pulp and paper are listed in this section. For integrated mills, pulp capacity includes pulp that is used internally to produce paper, and pulp that is shipped from the mill site as market pulp.

Notes:

1. Measurement units are in thousands of metric tonnes (000 mt).

2. Estimated annual capacity is based on a standardized operation of 345 operating days per year, 24-hours per day, although actual operations may vary from this schedule.

SHAKE AND SHINGLE MILLS

(Listed Alphabetically)

Mills that produce shake and shingles are reported in the following 2 sections:

a) Mills that produced more than 5,000 squares of shake/shingle products during the year.

b) Mills that produced less than 5,000 squares of shake/shingle products during the year.

Notes:

1. Measurement units are in thousands of roofing squares (000 sq). A roofing square is approximately 100 square feet.

2. Estimated annual capacity is based on a standardized operation of 240 days per year, two 8 hour shifts per day, although actual mill operations may vary from this schedule.

THE FOLLOWING MILLS PRODUCED MORE THAN 5,000 SQUARES IN 2001

VENEER, PLYWOOD, AND OTHER PANEL MILLS

(Listed Alphabetically)

Mills producing veneer, plywood and other types of panel are listed in this section. For mills that produce both market veneer and plywood, veneer capacity includes market veneer and the veneer that is used within the mill to manufacture plywood. Panel mills that use wood residuals to produce panels or that do not have log-processing capability are also listed in this report.

Notes:

1. Measurement units are in millions of square feet, 3/8" basis (mill. sq. ft., 3/8").

2. Estimated annual capacity for veneer mills is based on a standardized operation of 240 days per year, two 8 hour shifts per day. For plywood and other panel mills, estimated annual capacity is based on a standardized operation of 240 days per year, three 8 hour shifts per day. Actual operations may vary from these schedules.
